PROJECTS

College Advisor Website [🔗](#)

Built a dynamic web application that helps students find suitable colleges based on their marks and preferences. Developed using HTML, CSS, JavaScript, and integrated the Gemini API to provide AI-powered suggestions. Used Firebase for storing form data and real-time responses. Designed a clean UI and handled form validation and result display logic.

Authentication Web Page [🔗](#)

Created a simple login/signup page with email authentication using Firebase Auth. Built the UI using HTML, CSS, and form validation using JavaScript. Implemented password reset and error handling. Learned how to securely store and retrieve user credentials.
